

WOODMONT LINE PRODUCTS

MATERIALS AND CONSTRUCTION

All specifications below are current as of the date of this report. However, all are subject to change without prior notification, as conditions, costs or improvements warrant. All such changes are running changes and would not alter compatibility with existing product. When specifications change, Western has no obligation to make changes to previously manufactured items.

- Cabinet face frames are made of 3/4 X 1 1/2 solid hardwood, kiln dried to our specifications. Face frames are double screwed at all joints for maximum strength and squareness. End panels are 1/2 industrial grade particleboard with a light maple woodgrain finish applied on the cabinet interior surface, and woodgrain paper on the exterior surfaces to match exterior cabinet finish. Customers may order finished plywood end panels on any or all cabinets in the Woodmont line at additional charge. End panels are dadoed into the cabinet face frames and the corners reinforced with plastic angle blocks. Cabinet tops and bottoms also have a light maple woodgrain finish applied to both surfaces. Cabinet backs are made of 1/8 hardboard, with a light maple woodgrain finish applied to the interior surface.
- Shelves: Wall and Tall cabinets have 5/8 thick industrial grade particleboard shelves, light maple woodgrain finish applied. Shelves are fully adjustable, except as noted in the current price and specification book.
- All base cabinets have half depth shelves made of 5/8 industrial grade particleboard with light maple woodgrain finish applied. Shelves are fully adjustable, except as noted in the current price and specification book.
- Woodmont base cabinets feature four sided 1/2 dovetail plywood drawer boxes with epoxy coated side mount drawer guides. Drawer bottoms are 1/4 Plywood with light woodgrain finish applied on exposed surfaces.
- Woodmont cabinets feature solid hardwood raised center panels or veneer raised panel on all mortise and tenon door styles. Mitered styles feature a 1/4 plywood flat panel. Standard overlay styles feature a back beveled edge profile on doors and drawer fronts, eliminating the necessity of additional hardware.
- We machine all wooden cabinet parts to our specifications and assemble the cabinets using advanced adhesives and mechanical fasteners. We then install engineered plastic angle brackets at specific locations in each cabinet to add strength, and rigidity to the cabinet case.
- Note: All standard 24 wall cabinets are 24 1/2 . All Full Overlay cabinets are 24 .
- The bottom two drawers of DB30, DB33, and DB36 cabinets, as well as the bottom drawer of all vanity file drawer (VFD) cabinets, feature 1/2 plywood dovetail drawer boxes, and 1/4 plywood drawer bottoms with full extension side mount drawer guides.
